

LOS ANGELES MYCOLOGICAL SOCIETY

18 MAR 2023 – CHIQUITO BASIN, SAN ANA MTS. FORAY SPECIES LIST

Brisk, strenuous hike transitioning between chaparral and live oak woodland. Looking mostly for larger macrofungi. Tremendous abundance of chanterelles. Clear sky; temperature from mid-60s to low 70s (°F). Duration: 5 hours.

ASCOMYCETES

Coccomyces dentatus
Diatrype sp.
Helvella acetabulum
Helvella dryophila
Trichoderma viridae (anamorph)

GILLED FUNGI

Agrocybe pediades
Amanita ocreata
Bolbitius reticulatus <https://www.inaturalist.org/observations/151558184>
Candolleomyces candolleana
Cantharellus californicus
Clitocybe (live oak, whitish, lip gloss odor)
Clitocybe fragrans
Coprinellus sect. *Micaceus*
Coprinopsis uliginicola
Cortinarius (live oak; silvery purple, stipe equal; KOH-)
Cortinarius glaucopus group (cap KOH+ dingy red)
Cortinarius subg. *Telamonia* (scrub oak)
Crepidotus sp.
Deconica montana
Entoloma subg. *Entoloma*
Hemimycena sp.
Hygrophorus (scrub oak; old)
Hypholoma fasciculare
Inocybe cf. *subochrea* <https://www.inaturalist.org/observations/151696157>
Inocybe fraudans
Laccaria amethysteo-occidentalis
Lactarius alnicola (old)
Lactarius rufulus
Lentinellus ursinus
Lepiota cf. *boudieri* <https://www.inaturalist.org/observations/151656946>
Marasmius plicatulus
Mycena acicula
Omphalotus olivascens (old)
Phaeomarasmius erinaceus
Psathyrella longipes

LOS ANGELES MYCOLOGICAL SOCIETY

Psathyrella sp.

Schizophyllum commune

Tricholomatinae (dull orange, in moss)

<https://www.inaturalist.org/observations/151701577>

CORAL FUNGI

Clavulina cinerea

Phaeoclavulina myceliosa

SHELF AND CRUST FUNGI

Ceriporia sp.

Ganoderma subg. *Elfvigia*

Irpicaceae (Trametes-like, KOH-)

Stereum hirsutum

Stereum ochraceoflavum

Trametes versicolor

TOOTHED FUNGI

Hericium coralloides

JELLY FUNGI

Exidia glandulosa

Myxarium nucleatum

Naematellia aurantia

MYXOMYCETES

Lycogala epidendrum complex

Stemonitis sp.
